DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II, claims 19-28 and the disorder Alzheimer's disease in Paper No. 13 is acknowledged.

Claims 1-15 are withdrawn from further consideration as being drawn to non-elected subject matter.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolton '457, Bolton '030 or Tremblay et al. in view of applicant's admission of what is known in the art at page 6, first full paragraph of the instant specification.

The teachings of the references are of record in the instant application.

Since the references all teach using the claimed method to treat physical trauma or neurological disorders then it would have been obvious to one of ordinary skill in the art to treat a patient having Alzheimer's disease with the claimed method since

applicants admit on page 6, first full paragraph of the instant specification, that Alzheimer's disease is associated with increased apoptosis and so are the physical trauma (page 6, second full paragraph) and neurological disorders (page 6, first full paragraph), then it would have been obvious to one of ordinary skill in the art to practice the method claimed since both the references and the art admitted by applicant use the claimed method to treat these same diseases which all have increased apoptosis.
